

Kickin' Butts in Carlsbad!

Only Rain in the Storm Drain

Hold Onto Your Butts Before
They Get A Hold On The
Environment

Billions of cigarette butts are discarded each year on our streets and sidewalks. When it rains, storm water carries them to our water ways, beaches and ocean. As a result, they have become the most common type of litter found on our coastline and in the storm drain system. Cigarette butts are not biodegradable; in fact, it can take over 15 years to break them down, all the while releasing the toxic chemicals contained in the filters. Please hold onto your cigarette butts until they can be disposed of properly. Become a part of the Pollution Solution !
